

This image displays a complex grid-based pattern, likely a technical drawing or a data matrix. The pattern consists of a dense, repeating geometric design formed by blue and green lines. The grid is partially filled with numbers, which appear to be coordinates or data points. The numbers are arranged in a regular, repeating pattern across the grid. The overall structure is highly organized and repetitive, suggesting a systematic layout or a specific data representation. The grid is bounded by a thick blue border on the right side. The numbers are small and black, providing a clear contrast against the white background of the grid cells.
