WHEELS & LOOMS
INSTRUCTIONS

RAINBOW ONE POT DYE KIT

To dye 1kg/2.2lb Fleece wool *you will need:*

1. Add 1 measured teaspoon of dye powder to each jar.
2. Add ¼ cup of white vinegar to each jar.
3. Add 1 cup of boiling water. Stir with a stick to dissolve dye.
4. Fill remainder of jar with hot water. Approx. 2 cups.
5. Wash the wool with warm water using ¼ teaspoon of detergent. Rinse clean, leave wet.
6. Put ⅓ of the wool in a pot.
7. Pour some dye liquid in each area.
8. Press each colour area with a stick until you cannot see any white. Wool will soak up dye. DO NOT STIR!!
9. Add another ⅓ of the wool.

10. Repeat steps 7 & 8. Do not use too much dye liquid, just enough to colour the wool.

11. Add the rest of the wool.

12. Repeat steps 7 & 8. Do not use too much dye liquid, just enough to colour the wool.

13. Place lid on pot.

14. Bring to the boil then turn down to a medium heat. Cook for a maximum of 30 minutes or until the liquid is clear.

15. Drain wool, allow to cool, then rinsing with cold water. Spread out to dry.
