

VARI DENT REED

For Knitters Loom 30cm (12")

Weaving width 30cm (12")

Now enjoy complete creativity when warping your rigid heddle loom.

Weave with art yarn, thick, thin and anything in-between yarns to create artistic scarves, shawls, clothes and decorative home ware.

Manufactured by: Ashford Handicrafts Ltd., Ashburton, New Zealand

RDV3

To change reed sections:

- Completely remove the knob from one end.
- Loosen the knob at the other end about 6mm/1/4".
- Remove all the reed sections from the frame.
- Lay the frame with the Ashford logo facing down on a flat table.
- Choose the warp yarns for your project and select the appropriate reed sections to suit.
- Lay the sections flat side down in order. The bumps on the end of each section touch the straight edge on the next.
- Check all the sections will fit between the aluminium spacer rods.
- Starting from the left, slide all the sections into the grooves in the top and bottom reed rails. Take care not to force the reed rails apart.
- Insert the aluminium spacer rod back into the hole in the top reed rail, insert and partially tighten the knob.
- Slide the reed sections until there is an equal gap at both ends. Then tighten the knobs but don't over tighten.

Due to the aluminium spacer rods and numerous combinations of reed sections, the weaving width will be a little less than a normal reed.

Vari Dent Reeds are available for:

Samplelt Loom 25cm and 40cm / 10" and 16"

Knitters Loom 30cm, 50cm and 70cm / 12", 20" and 28"

Rigid Heddle Loom 40cm, 60cm, 80cm and 120cm / 16", 24", 32" and 48"
